O2 - Community Heritage GeoTrail in vulnerable areas

Output Information

Project acronym	COMM.ON HERITAGE
Project title	Community Manager for Inclusive Development of Vulnerable Areas based On Heritage
Project website	https://common-heritage.eu/
Output number	O2
Output Tittle	Community Heritage GeoTrail in vulnerable areas
Partners in charge (authors)	All
Date	April 2022

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them.

This output was created within the project Comm.on Heritage: Community Manager for Inclusive Development of Vulnerable Areas based On Heritage. Reference number: 2019-1-IT02-KA204-062382

The Heritage Geotrail puts into practice the principles of engagement and inclusion, as described in the Guide, and involves both processes and outputs (results) that are presented hereafter.

Processes

All partners mobilised community leaders (e.g. representatives of associations, local experts on heritage, entrepreneurs or SMEs committed to traditional productions or to tourism activities) to participate in a workshop (8 hours), in its territory, which was considered to be organised in two parts:

a) World Café, aimed at sharing a common interpretation of local heritage, selecting main tangible and intangible elements to be included in the Geotrail.

b) Practical session, to familiarise the participants with the Geocaching approach and to outline ways of hiding the geocaches.

The details of the Workshops organised by each partner are available in Appendixes 1 to 4, disclosing an adult education process on local heritage, based on a recreational tool – Geocaching.

Outputs (Results)

Geocaching is an outdoor recreational activity, in which participants use a Global Positioning System (GPS) receiver or mobile device or other navigational techniques to hide and seek containers, called "geocaches" or "caches", at specific locations marked by coordinates, all over the world.

Each geocache is a waterproof box containing at least a logbook to be signed by the visitors.

Based on the selection of tangible or intangible heritage elements resulting from the Workshops, each partner created a Geotrail in its own territory. The overall result is a Comm.on Heritage Geotrail covering the four regions involved in the project, including 25 Geocaches.

The Geotrails produced in each region are accessible to persons with low mobility, in line with the inclusion objectives of Comm.on Heritage.

The geocaches of each Geotrail were uploaded on the international website of Geocaching, as summarised in the following pages.
